Welcome To PPC FLASHINGS

At PPC Flashings, our mission is to provide exceptional customer service matched with high-quality local manufacturing of non-combustible metal rainwater goods, accessories, and flashings, to fully support our clients with their project requirements. We manufacture high quality, non-combustible metal rainwater goods, accessories, and flashings.

Along with our parent company, Professional Plumbing Contractors we have been serving the commercial and residential building sectors since 2007. In addition, our sister company – Architectural Cladding Suppliers specialise in non-combustible architectural metal cladding and roofing solutions, offering a complete end to end supply channel for your next project.

Our core strength is built on our ability to work with our clients to manufacture high quality, non-combustible metal flashings, rainwater goods, and accessories. Combined with our technical expertise and extensive machine capabilities, PPC Flashings also offers sheet metal fabrication services to support your business.

Our Capabilities

Sheet Metal Fabrication Machinery

Our extensive sheet metal fabrication machinery includes Slitter/Folders, Slit To Length Lines, Clincher, and Pan brake folders. Our sheet metal fabrication machinery is capable of producing high-quality products for many different applications within very short lead times. Our extensive sheet metal fabrication machinery includes two Slitter/Folders, Slit to length line, Clincher, and Pan brake folders.

This means quicker manufacturing and efficient fabrication, enabling PPC Flashings to meet urgent job requests and project specified deadlines. At PPC Flashings, we have the supply connections and quality flashings and rainwater goods to service your building project needs from start to finish. Our solutions aim to provide you with the finish, quality, and reliability to keep your projects running efficiently, on-time and to budget.

Estimating, Technical Advice & Project Management

At PPC Flashings, we work closely with our clients using estimating and project management solutions to ensure all requirements and specifications are examined. Our project management team provides extensive detailed design advice to architects and designers, to help resolve any possible budget and construction challenges. This provides a level of assurance and ease once construction is underway to have solutions when potential issues occur.

Focus on Quality & Certification

The PPC Flashings team is driven by the highest of standards of product quality and traceability. We offer a technical support and advice to our clients to comprehensively plan each step of their requirements. Understanding our clients' objectives and vision is our priority. This allows us to establish plans to ensure our flashings and rainwater goods are fit for purpose.

End To End Supply Connections

We aim to provide our clients with a complete end to end solution, from start to finish, ensuring quick turnaround and limited outage times. This provides a level of assurance and ease once construction is underway to have solutions when potential issues occur. The PPC Flashings team takes great pride in delivering work which is second to none in safety, efficiency, and quality. We work hard to build strong working relationships with our clients, partners, suppliers, people and the wider community.

Network Coverage & Delivery Footprint

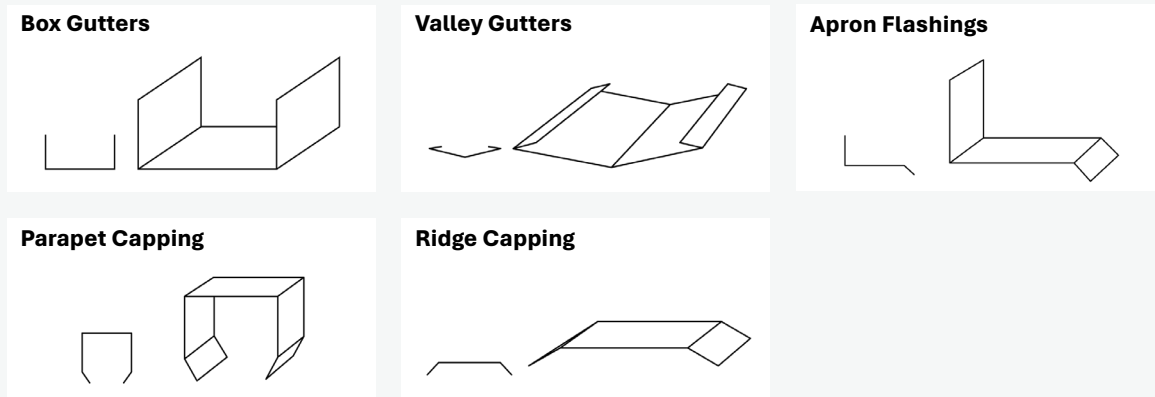

The PPC Flashings team offer Victoria Wide Delivery to metro and regional areas. We can also arrange Interstate/International Deliveries as required by our clients, as we work towards urgent and responsive lead times. Our team works hard to ensure deliveries are made on time every time, helping to keep our clients projects run smoothly as possible.

Flashings

We can fold and fabricate a wide range of flashings to suit our clients' project specifications and requirements. PPC Flashings are available in a wide range of available thicknesses and material finishes.

Types Of Flashings Available

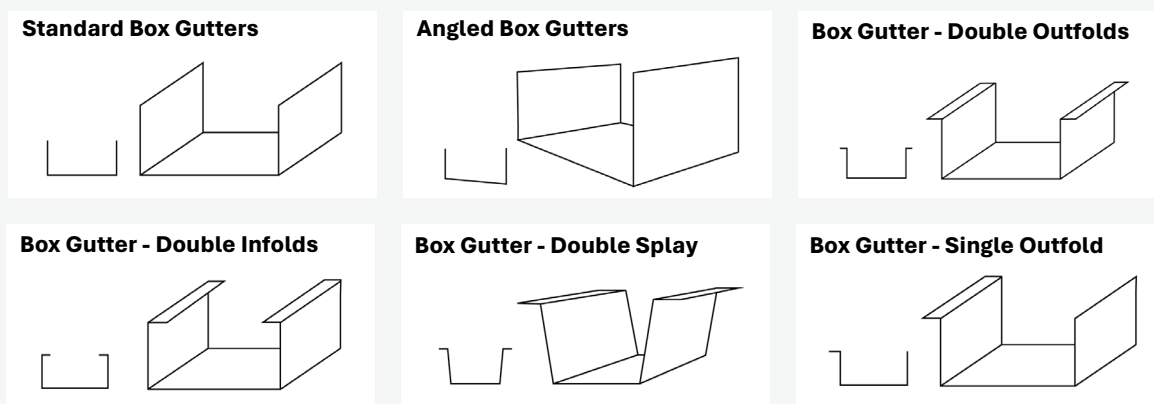

Custom Flashings can also be manufactured to meet your specific project requirements. Whether you're looking for curved aprons, ridge caps, barge caps, or box gutters, you can find them all at PPC Flashings. All of our flashings at PPC Flashings are manufactured locally to provide you with quality assurance, backed, and fully certified by our trusted suppliers.

Box Gutters

Box Gutters available from PPC Flashings are either square or rectangular, and installed within the boundaries of a roof. These gutters collect stormwater and dispose of it through downpipes.

Types Of Box Gutters Available

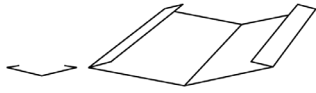

Valley Gutters

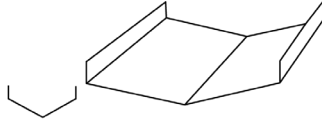

Valley Gutters available from PPC Flashings are shallow gutters manufactured to suit the angle between two internal slopes of a roof. These gutters collect stormwater and dispose of it through downpipes.

Types Of Valley Gutters Available

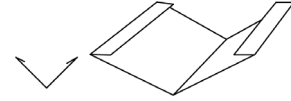

Standard Valley Gutter

Valley Gutter With Upstand

Valley Gutter With Folds

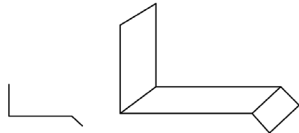

Apron Flashings

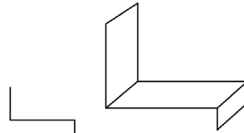

Apron Flashings available from PPC Flashings are folded pieces of metal installed to help prevent any water from penetrating spaces in roofing.

Types Of Box Gutters Available

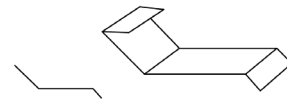

Standard Apron Flashing

Apron Flashing - 90° Turndown

Angled Apron Flashing

Ridge & Parapet Capping

Ridge Capping available from PPC Flashings is a covering applied over the ridge to provide protection, coverage, and an effective weather seal between two slopes in roofing applications.

Parapet Capping available from PPC Flashings is a covering installed to waterproof and cap the ends of vertical metal sheets or metal cladding walls. The types of Ridge and Parapet capping available can be made to order.

Types Of Ridge Capping Available

Standard Ridge Capping

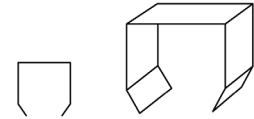

Birdbeak Ridge Capping

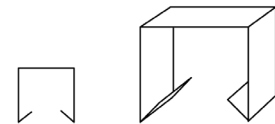

Types Of Parapet Capping Available

Standard Parapet Capping

Parapet Capping - Return Sides

Sumps available from PPC Flashings hold stormwater and collect debris before it flows into downpipes.

Access Hatches available from PPC Flashings provide safe and easy access to your roof.

The types of Sumps and Access Hatches available can be made to order.

Types Of Sumps and Access Hatches Available

Roofing Accessories

High Quality Roofing Accessories

Our roofing accessories comprise:

- Fixings
- Battens
- Gutter Boards / Brackets
- Safety wire
- Insulation
- Membrane
- Polycarbonate / Fibreglass Sheeting
- Ventilators & Skylights
- Access Hatches

Insulation

PPC Flashings can supply various types of roofing and cladding insulation depending on your necessities. We are also able to supply any accessories that may also be required to fulfill your building specifications.

Membrane

Here at PPC flashings we stock a range of vapour permeable roof and wall wraps. This product allows for the controlled escape of vapour from within your building whilst restricting the access of liquid moisture. This helps to protect the building core and insulation from condensation and related problems such as mould, timber rot, corrosion and loss of thermal resistance. Membrane tape is also available.

Polycarbonate & Fibreglass Sheeting

Polycarbonate and fibreglass sheeting can also be supplied by PPC Flashings. It is a durable transparent sheet with high resistance to climatic conditions. These products are used in a wide range of applications including roofing and building construction.

Ventilators & Skylights

Polycarbonate and fibreglass sheeting can also be supplied Ventilators provide effective natural ventilation of the roof space which helps prevent damp conditions that cause mould and mildew. Skylights provide ventilation as well as light for many types of roofing installations. Ventilating a building with an operable skylight releases the hot air that naturally accumulates near the ceiling.

Access Hatches

Access Hatches supplied by PPC Flashings provide safe and easy access to the roof area. These can be manufactured to your customised requirements.

Custom Orders

You can custom order a variety of roofing accessories, made to your specifications with a diverse range of material finishes to compliment your project.

Our high-quality material finishes comprise:

- COLORBOND® steel
- elZinc®
- VMZINC®
- Aurubis
- Unicote® LUX
- Customer supplied material finishes
(contact the PPC Flashings team for more information)

Colorbond® elZinc® VMZINC®

Aurubis UniCote®LUX

Rainwater Accessories

High Quality Rainwater Accessories

Our rainwater accessories comprise:

- Overflows and Roof Cowls
- Fascia / Gutter / Roll Top Ridge
- Downpipes

Overflows & Roof Cowls

Overflows could be caused by debris blocking the gutter or downpipe and stopping the flow of rainwater. Our overflows help to prevent this from occurring. Our Roof Cowls provide a weatherproof cap, whilst allowing air flow to escape from ventilated areas.

Fascia, Gutter & Rolltop Ridge

A range of fascias, roll top ridge and gutter profiles are available through PPC Flashings along with all components to match.

Polycarbonate & Fibreglass Sheeting

Polycarbonate and fibreglass sheeting can also be supplied by PPC Flashings. It is a durable transparent sheet with high resistance to climatic conditions. These products are used in a wide range of applications including roofing and building construction.

Downpipes

We are able to supply a full range of downpipes to meet all building and architectural requirements. Downpipes are available in standard sizes, however, can be made to your custom specifications. Pops, saddles and offsets are also available to suit all downpipes.

Custom Orders

You can custom order a variety of rainwater accessories, made to your specifications with a diverse range of material finishes to compliment your project.

Our high-quality material finishes comprise:

- COLORBOND® steel
- elZinc®
- VMZINC®
- Aurubis
- Unicote® LUX
- Customer supplied material finishes
